

# AGI Spring 2010

## University Grant Competition

AGI invites college students to join aerospace professionals around the globe in creatively solving problems using AGI software with our first University Grant Competition.

Full-time undergraduate and graduate students are invited to demonstrate problem solving, creative and programming skills using AGI software including STK, Components libraries and Insight3D in this inaugural contest for spring 2010.

### Why enter?

**Funding!** Winners in each of five categories will receive a \$1,000 grant award and second-place winners will receive \$200.

**Resume building!** All accepted entrants will receive a voucher for a free STK certification test—a \$495 value—and an invitation to present your AGI software solution to AGI users and potential future colleagues at the 2010 AGI road show.

**AGI gear!** This is the only way to receive your AGI University Grant Competition t-shirt and, once you complete your STK certification, your STK Rocket Scientist polo shirt.

### ***Submissions are being accepted NOW!***

- ***Application period closes March 1, 2010.***
- ***Final project submissions due March 15, 2010.***
